

NEVER MISS A BEAD

The industry's only solution for real-time
bead flow monitoring at every gun.

ACCU-BEAD™ Flow Sensor

Ensure spec compliance
and avoid costly rework

Compatible with all reflective
beads and elements

Quick and easy
installation

Graco's ACCU-BEAD™ flow sensor redefines precision in reflective bead application. It provides real-time, per-gun monitoring of bead flow rates, allowing contractors to ensure compliance with job specifications and reduce costly over-beading or rework. Designed for easy installation, ACCU-BEAD seamlessly integrates with any bead gun system, delivering unparalleled accuracy and efficiency.

EASY INSTALLATION

Compact, in-line design can be installed in just minutes using common hand tools

Add data-logging to trucks faster and more easily than bead tank scale systems

PRECISE, REAL-TIME BEAD FLOW FOR EACH GUN

Patented in-flow design provides immediate flow measurement and is unaffected by truck movement or environmental conditions.

Actual size of ACCU-BEAD sensor

Paired with Skip-Line's data logging system, ACCU-BEAD offers contractors unmatched operational insights and automated reporting to streamline job performance and compliance.

Data is captured and organized into actionable insights, which are then synced with Spec-Rite Online. This system empowers contractors with accurate, real-time information, helping to ensure every job is completed efficiently and correctly.

BUILT FOR DURABILITY

Engineered for harsh environments with IP67-rated components.

BROAD COMPATIBILITY

Works with any bead gun system and supports all reflective beads and elements.

CUT THE WASTE & SAVE BIG

Real-time data lets you dial in the perfect application rate, reducing wasted beads.

REAL-TIME MONITORING

- Real-Time usage *per gun*
- Real-Time and Average bead application rates *per gun and per tank* — lbs/gal, lbs/mi, lbs/100sf and more

ALERTS

- Over/under target application rate, bead tank levels, and more

BEAD TANK MONITORING

- Displays amount of the beads used and remaining in each tank

MEET SPEC ON THE FIRST PASS

- Real-time monitoring and alerts ensure spec compliance — avoiding costly rework
- Quickly identify and troubleshoot bead system issues in the field

GUIDED CALIBRATION | DATA LOGGING | ADVANCED DIAGNOSTICS

ACCU-BEAD™ FLOW SENSOR

*THE INDUSTRY'S ONLY SOLUTION
FOR REAL-TIME BEAD FLOW
MONITORING AT EVERY GUN.*
