SIMPLIFY YOUR STRIPING OPERATIONS WITH PIGEON

Go Green! Eliminates the need for paper reports

Eliminate the need for paper reports by automatically reporting job-related data directly from the field to the office. Along with saving paper, our hardware options free time from field personnel's schedules and allows them to focus on other priorities.

Remotely monitor real-time application rates

Keep track of quantities and material usage. Have accurate data of machine operating time. Monitor machine service hours to schedule future maintenance and repairs.

Plug and play on your existing SKIP-LINE equipment

Our hardware starts working as soon as you connect it to your equipment and instantly gets your equipment in the cloud. Pigeon has been developed to work with existing Skip-Line equipment. Get your equipment up and running without the need for special configurations or installations.

Live fleet GPS tracking

Gain a holistic view of what your fleet is doing and where it is located. Get equipment location, speed, and distance in real-time. Increase transparency and accountability from your team.

Hands-free logging

Regardless of where you take your equipment, our hardware continues collecting data while your equipment is in operation. From service hours and distance covered, generate daily progress reports and establish future benchmarks.

Transmit equipment data to the cloud

Fulfill the reporting needs between field operations and Accounting departments by streamlining the transfer of critical job-related data directly to cloud servers.
